

# **REPORT FOR KWOC 2017**

PROJECT NAME :- weed

MENTOR :- Apurv (github-handle:-rava-dosa)

REPORT :- At first i had no idea of programming and what i was going

to do ,but i started to learn a lot with the help of my mentor and materials provided by him were extremely beneficial,But i could not keep up with the pace and was learning slow But i tried my best and tried to contribute by making a Makefile for the program but that too was a fail.

CONCLUSION :- IN A NUTSHELL, i tried contributing but that was not accepted as it was wrong but i still learnt a lot during the projects.Thanks a lot for the experiences. I was limited as i did not know much of the concepts and took time to learn and still learning.As a whole, the KWOC journey was memorable. I wrote this report because my name was on the board and so it should not go unattended.

Thank you so much,

Anukul chand
